

Speech about December the 10th :

World day for animal rights

Everyone knows **the day for human rights** everywhere in the world, but **on the same day takes place another special world day. It's the world day for animal rights !**

This day should be given a little more importance !

Animals are everywhere in our daily life :

For example, in France there are around 62.750.000 PETS.

Fish are the main pets, followed by cats and dogs.

We also distinguish **FOOD ANIMALS** (like cows, pigs, chickens, - even cats and dogs-) that are used to feed us. They are imprisoned and exploited in factories or on farms. They were born in prison, they live in prison, and they die in prison. And sometimes, they never see daylight...

There is also another category of animals : what we call **STRAY ANIMALS**. Most of the time, they were born in the streets or are abandoned.

And a last category, smaller in number but not the least : **ANIMALS USED IN LABORATORIES** for testing. It is mainly mice, but also sometimes monkeys and dogs. Furthermore some testings are indescribable and really painful for them...

In all these categories we can find a lot of suffering.

We have to fight against all forms of violence on animals, because **each animal has a conscience and can feel emotions, like us...**

**ANIMALS THAT ARE
TREATED CORRECTLY**

**ANIMALS THAT ARE
ILL TREATED**

ANIMALS DO NOT CRY... THEY SUFFER SILENTLY

Every 60 seconds, a species dies out

Imagine this is yours

If you don't pick it up, they will

Don't buy exotic animal souvenirs

Horrifying. More horrifying.

What on earth are we doing to our planet ?
